

Report of 40th Meeting in Slovakia, Banská Bystrica, MUDr Juraj Sninský

Dear WMTS EC members, dear WMTS Country Delegates, dear colleagues and friends!
On the behalf of the organizing committee, most importantly on the behalf of the director of this tournament Mr, Juraj Sninsky I will try in the following to provide you a survey of the organization and management of the WMTS 2010 in SLOVAKIA.

It was decided back in 2008, in Malta, that the annual 40th meeting would be held in Banská Bystrica. Weeks and months of planning, had started.

General feedback

As a first step a web site was set were the place of venue was introduced in order to firstly have a clue and learn where Banská Bystrica really is and to give a chance and enough time to all participants to decide to come. It was not an easy decision for them to make, since Banská Bystrica isn't easy to reach, no airports in convenience distance and certainly it is not on the list of big and famous capitals cities.

This could have been a small disadvantage and it gave the organizers another concern on the agenda to take care of. Participants were offered transport from / to airports (Vienna, Budapest and Bratislava), shuttle buses were arranged according to demand.

The place of venue was Hotel Dixon, owned by Mr, Juraj Sninsky, with 12 nearby clay courts and another 6 courts in City Park. Transportation between the tennis courts were guaranteed and managed by 6 cars driving back and forwards according to demands.

40th meeting in numbers

Organizing of the tournament took more than two years. Mr. Juraj Sninsky, has define particular tasks and set up a team of at first 5 members. The head of this team was from the beginning Ing. Miriam Turianska. Soon other 10 members and assistants joined this organizing group and 6 month prior to the event the Tournament and Congress management has 20 co-workers, with responsibilities sharply given to each. There were 10 volunteers, 7 drivers who helped participating.

The executives

- MUDr. Ondrej Miroslav
- MUDr, Žilinčan Vojtech
- MUDr, Angst Svetozár
- MUDr. Suchá Margita
- MUDr. Sninský Juraj

All of these above mentioned, were actively participating at the previous tennis tournaments including this one

Referees

- chief of referee Ing. Juraj Valentíny,
- assistant referee Dagmar Regendová

Organizations

- Ing. Miriam Turianska
- Andrea Dilíková
- Lenka Kováčová

and others administrators were meeting on regular bases, twice a month, as the event was approaching; the frequency was shortening to once a week.

Since September 2009 official registration has began and first application forms were received.

Total delegates 288 out of 24 countries participated

Out of it

198 players / 28 Spouses / /3 non players

Juvenile 5 / Children 4

Divided to men and women:

165 men were 9 categories were open

61 women were we opened 8 categories

During registration 14 delegates has canceled their participation mostly due to health reasons.

TDM report

To maintain the tennis tournament TDM software was ordered with a great support of Mr, Schaechter who at the end could not travel to Slovakia to help with the installation and management of the software. Therefore, a team of tennis referees together with considerable software support of Mr. Peter Sojka were assigned to manage the tennis data which were in the mean time carefully recorded by team of registrants. Due to very little knowledge of TDM use this process was slow at the beginning. However, step by step, the team was getting into it and easy managed to effectively use it; here special thanks go to Mr. Sojka, MUDr. Žilinčan and Ing. Juraj Valentíny. TDM was freshly added with participant's tennis data and was sufficiently helping to set tennis draws. Fairly enough, at the end of this process, support of Mr. Egilis Valeinis with the seeding of players was unspeakable.

Financial report Attached

Remarks

The registration process was not at all times running smoothly. There where obligatory documents to be filled –in and send to the registrants in order to register correctly. All of them were published on the WMTS <http://www.dixon.sk/wmts2010/> assessable since the registration started. These documents were similar to these used in previous championships, therefore considered easy to supply and friendly to all.

Unfortunately, not all the patricians had made this step properly and on time. There were lot of information missing, especially dates and years of born, which are essential for the tennis draws for example. Furthermore, no categories were marked on the tennis application forms and the tennis tournament organizations had troubled to manage the tennis tournament properly and on time.

This fact was ultimate and determinate the running of the tennis draws categories estimation and of course had remarkably influenced the smoothness of the tennis tournament establishment. Some participants could have found it disturbing, objected and made complaints about it. The fact is, lots of information regarding their particular tennis application were supplied on-site, which was found inconvenient for all – them, the partners and the tennis schedules as well.

Suggestions

Once the database of players exists, for the best of tennis tournament management and cooperation between the former or future organizers there should be a strategy assigned that gives a clear and specific guidelines on the maintenance of TDM or the tennis database itself.
